

VIKTOR TASESKI

Third-Year BSc Computer Science Student

vtaseski24@gmail.com | +386 69 937 005 | [LinkedIn](#) | [GitHub](#) | [Website](#)

EDUCATION

BSc Computer Science , FAMNIT University, Koper, Slovenia – GPA: 7.8/10	2023 - Present
High School Electrical Engineering , OSTU Gostivar, North Macedonia – GPA 4.9/5	2019 - 2023

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, C#, C/C++

Web: Angular, React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind

Backend/DB: Node.js, FastEndpoints, MySQL, PostgreSQL

Tools & Services: Git, Render, Cloudinary, Brevo, Zoho Mail

PROJECTS

Railroads - Jan 2025 [Java, MPJ Express] [\[GitHub\]](#) [\[Results\]](#) [\[Video\]](#)

- Implemented a **Genetic Algorithm + DFS** to find the most affordable railroad map.
- Built **sequential, parallel, and distributed** versions; achieved **4.9x speedup** (parallel) and **~60% faster runtime** (distributed via MPJ Express) vs. sequential.

Dentra - Active [Next.js, Node.js, Brevo, Cloudinary, Electron, Vite 5] [\[dentra.mk\]](#)

- Built an online appointment booking platform for dental clinics, handling scheduling, admin panels, and DNS/hosting setup.
- Integrated transactional email reminders via Brevo and media management via Cloudinary.
- Developed a desktop app (Electron + Vite) with a 32-tooth chart, patient records, and treatment history.

ML Diabetes Prediction – Jan 2026 [Python] [\[Open on Kaggle\]](#)

- Implemented **ANN** and **Gaussian Naïve Bayes** models with full preprocessing pipeline and structured experimentation, documenting all modeling decisions and performance analysis.
- Achieved **~80%** overall accuracy; ANN reached **87%/63%** recall (diabetic/non-diabetic) and Naïve Bayes **81%/66%**, with the class imbalance reflected in the stronger detection of positive cases.

Anisija Freelance - Active [HTML, JS, Render, DNS] [\[anisija.org\]](#)

- Built and maintain the NGO's website, including DNS, HTTPS, and hosting setup.

SelfServ – Oct 2025 [React, Node.js, PostgreSQL] [\[GitHub\]](#) [\[Live\]](#) [\[Agent\]](#)

- Built a full-stack self-ordering system for cafés and bars, enabling customers to browse menus and place orders via NFC or QR-code without staff interaction.
- Implemented real-time order routing to POS printers, along with an analytics dashboard for order tracking.
- Developed a standalone print agent for custom POS receipt printing using raw printer commands.

Ticket Office – Apr 2025 [React, Node.js, MySQL] [\[GitHub\]](#) [\[Video\]](#)

- Full-stack ticketing system for event organizers: event upload, reservations, and QR-code based ticket validation and attendee check-in.

WORK EXPERIENCE

Software Developer – ACTUAL I.T.	May 2026 - Present
Freelance Web Developer – NGO Anisija	Nov 2025 - Present
Waiter – Golden Loggia	Oct 2023 - Aug 2025
Direct Sales Representative – Kirby Company	Jan 2023 - Aug 2023
Event Organizer – City Cinema	27 th May 2023
High School Internship – Mi-Mak Electronics	Feb 2022 – May 2022
Freelance Graphic Designer	Jan 2021 - Present

ADDITIONAL INFORMATION

Languages: Macedonian (native), English (advanced), Serbo-Croatian (conversational), Slovenian
